

Wound Care and Infusion Therapy Centres

Patients can now visit a specialised Wound Care and Infusion Therapy Centre run by Registered Nurse Practitioners offering personalised and specific treatments in conjunction with their treating Doctor

Beatha Healthcare's Wound Care Centres create treatment plans for all ACUTE (both surgical and traumatic) and CHRONIC wounds requiring frequent evaluation and dressing changes

Chronic wounds that do not heal well, or heal very slowly, can become a serious problem. Such wounds require special care and treatment to prevent infection, loss of function and progression to an irreversible state requiring surgical intervention

Beatha Healthcare's team consists of practitioners with many years experience in the fields of Trauma and Emergency Medicine, Critical Care (ICU) and Advanced Wound Care management

It is Beatha Healthcare's commitment to improve mobility, independence and quality of life

Patients who are currently benefiting from treatments undertaken at one of Beatha Healthcare's Infusion Therapy Centres include (*but are not limited to*):

- Osteoporosis
- Rheumatoid arthritis
- Rehydration therapy
- Immunoglobulin therapy
- Iron replacement therapy
- Multiple Sclerosis therapy
- Patients unresponsive to oral antibiotics
